RE: QUIKCOTE VELVET “DADDO” FINISH

Product Name: Quikcote Velvet Finish

Use: Quikcote Velvet Finish is a product used to achieve a superior fine smooth surface profile for exterior and interior application. Can be used on most masonry surfaces. Refer Quikcote for more information.

Velvet finish is mixed with water to a creamy consistency. Applied by trowel in one thin coat first; then proceed with another thin coat over the top of first coat while it is still wet. Then work the product with a steel trowel till finally achieving a smooth glossy type finish.

Physical description: Light grey odourless powder.
Alkaline reaction when wet with water.
Soluble in water.

Ingredients: Cement	40%
Fillers	30%
Acrylic polymers	10%
Carbonates	20%

Health hazard: Ingredients are not deemed hazardous.
